Mr. James E. Traylor, Chief
Technical Support Branch
Division of Land Pollution
Control
Indiana State Board of Health
1330 West Michigan Street
Indianapolis, IN 46206-1964

Dear Mr. Traylor:

The purpose of this letter is to confirm the conversations Jim Brush and I have had with you regarding the soil boring within the southwest building addition. The attached sketch indicates the location of the boring as approved by you.

The boring was taken utilizing a dozer-mounted boring rig. It is my understanding that the method of taking the boring was a satisfactory one to you.

As we have discussed, it is our hope that a satisfactory sample was obtained but as you know there was some danger of soil collapse. We have also discussed with you the possibility of there being some differences of opinion in the interpretation of this sample due to the unknowns connected with the soil where the sample was obtained.

Very truly yours,

John D. Burt
